Situation Overview

- **California State of Emergency Proclamation**

On March 4, 2020, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **Global Health Advisory**

On March 19, 2020, the U.S. Department of State issued a Global Health Advisory at Level 4 (Do Not Travel) due to the global impact of COVID-19.

- **Executive Order N-33-20**

On March 19, 2020, the California State Public Health Officer and Director of the California Department of Public Health (CDPH) ordered all individuals living in the State of California to stay home or at their place of residence, except as needed to maintain Continuity of Operations of the federal critical infrastructure sectors.

- **FEMA-4482-DR-CA**

On March 22, 2020, President Trump approved Major Declaration FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

Guidance

- CDPH is drafting the following guidance:
 - Infection Mitigation in Behavioral Health Facilities
- The CDC Health Alert Network (HAN) advised consumers on July 5, 2020, not to use any hand sanitizer manufactured by “Eskbiochem SA de CV” in Mexico, due to the potential presence of methanol, a “toxic alcohol”, as an active ingredient, which can cause blindness and/or death when absorbed through the skin or when swallowed.
- CDPH announced on July 5, 2020, the most recent statistics on COVID-19. California's positivity rate – a key indicator of community spread – is trending upward in the 14-day average. Hospitalization rates are also trending upward in the 14-day average. California has 260,155* confirmed cases to date. Numbers may not represent true day-over-day change as reporting of test results can be delayed, as reported below in the case of Los Angeles County for the next few days. There have been 4,680,138 tests conducted in California. As testing capacity continues to increase across the state, an increase in the number of positive cases has been expected – increasing the importance of positivity rates to find signs of community spread. There have been 6,331 COVID-19 deaths since the start of the pandemic.
